Boring for European Hinges

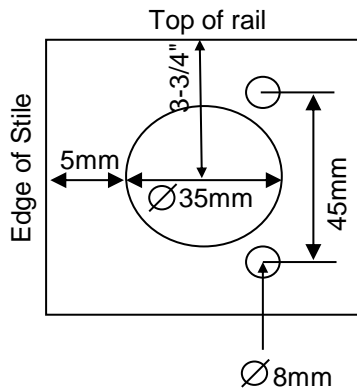

To order doors bored for hinges check the "Bore L (left) or Bore R (right) next to each door on your order form that you want bored. Specify left or right bore as viewed from the front of the door. For bottom hinge bore write "bore bottom" in notes section of order form. Standard bore pattern includes center cup and dowels. For cup only (no dowel holes) specify "cup only" in notes.

Standard placement is shown below. Call for information on special hinge bore placement.

Bore hole is 3-3/4" on center from top of the top rail edge and bottom of the bottom rail edge to the center of the bore hole.

Hinge boring is not available on doors made with OEABD outside edge.

Call for hinge bore pricing for your custom cabinet doors. Standard lead time. Bore pattern does not work for all hinge types.

Special Considerations:

* Doors taller than 45" ordered bored for hinges will automatically receive 3 hinge bores unless otherwise requested.

* Doors taller than 55" ordered bored for hinges will automatically receive 4 hinge bores unless otherwise requested.

* Doors taller than 65" ordered bored for hinges will automatically receive 5 hinge bores unless otherwise requested.

* Doors and drawer fronts ordered outside of size recommendations become the sole responsibility of the customer

Blum® European Hinges and Plates

Blum® Clip Top 120° European Hinges (71T5580) and hinge plates (175L6630) are available. Call for pricing.

Screws are not included.

Fingerpull Rout

Center fingerpull rout is available on doors and drawer fronts.

Not available on OEABD outside edge.

Fingerpull is placed 3-1/2" in from outside edges.

Price for standard fingerpull rout is \$4.00 per door/drawer front.

Specify fingerpull top or fingerpull bottom in notes section if ordering arched doors or doors bored for hinges.
